DETAILED ACTION

Information Disclosure Statement

1. The Information Disclosure Statement submitted by applicant on 04/20/2001 has been considered. Please see attached PTO-1449.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.
- 3. Claims 1-4 are rejected under 35 U.S.C. 102(e) as being anticipated by Cohen et al., hereinafter Cohen (U.S. Patent No. 6,233,659).

As per claims 1-4, Cohen teaches a multiplexed address and data bus controlled by a bus master and its method for communication between two microprocessors [processors A and B (see Fig. 1), or memory controllers A and B (see Fig. 7)], comprising: a plurality of multiplexed address and data lines in communication between the two microprocessors [addresses A and B, and D/Q A and D/Q B (see Fig. 2)]; a

Application/Control Number: 09/838,975

Art Unit: 2187

read/write control signal line in communication between the two microprocessors for communicating whether a read or a write operation is to be performed [Modes 1 and 2 (see Fig. 2 and 3)]; a chip select line in communication between the two microprocessors, said chip select line transitioning to an enable condition during a data transfer cycle [RAS and CAS and comparing the addresses through a comparator to determine which half of the memory is being accessed (column 4, lines 34-52)]; and a data strobe line in communication between the two microprocessors, said data strobe line providing a plurality of signals for each data transfer cycle wherein each data transfer cycle includes a plurality of write and read sequences which are initiated by said signals from said data strobe line, wherein the sequences include an address transfer and a data transfer sequence [output enable A, output enable B, write enable B (see Fig. 3); refresh A, refresh B (see Fig. 2)].

Conclusion

- 4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
 - U.S. Patent No. 5,450,355 (Hush)
- 5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Nasser G Moazzami whose telephone number is (703) 305-0017. The examiner can normally be reached on 7:00AM-5:30PM.

Application/Control Number: 09/838,975

Art Unit: 2187
